PRODUCT OVERVIEW / 2026

Nasher Studio

From news to social content, all in one AI-powered studio.

Nasher turns news feeds, articles and ideas into branded videos, posters, vertical stories and multilingual posts - with editorial approval before publishing.

8	200+	23	170+

What the platform does

An integrated production workflow, rather than separate AI tools.

01
Newsroom inbox
Bring RSS feeds, article links and ideas together, with breaking-news alerts and approval requests.

02
Visual AI workflows
Chain research, drafting, visuals and rendering, with upfront cost estimates and human approval gates.

03
On-brand templates
Auto-fill RTL-ready designs for posts, stories, videos and thumbnails in multiple aspect ratios.

04
Video story builder
Turn articles into vertical video with scripted scenes, vocalized Arabic narration, images and music.

05
AI dubbing
Transcribe, translate and clone speaker voices; add lip-sync, captions and line-level quality checks.

06
Publish & measure
Review, schedule and post to eight social channels, with analytics and retry-on-failure support.

How it works

Three steps, with editorial control

1 INGEST
RSS feed, story link or idea

2 CREATE + APPROVE
AI writes, designs, voices and renders

3 PUBLISH
Schedule, distribute and track

BUILT FOR ARABIC NEWSROOMS
RTL editing, Arabic tashkeel, dialect-aware dubbing and reusable brand standards.

Plans & access

Free: 2 seats | Starter: 5 | Pro: 20 | Business: 100

Usage allowances vary by tier. Contact Nasher Studio for pricing and onboarding.
