ARABIC-FIRST AI

Nasher Studio

From breaking news to scroll-stopping videos, branded posts and multilingual stories.

An end-to-end creation and publishing platform for modern newsrooms.

8 publishing platforms

200+ AI models

23 voiceover languages

170+ Arabic-first fonts

HOW IT WORKS

From news to published in three steps

One flow connects newsroom inputs, AI production and social distribution.

01

Bring in the news

RSS feeds, an article link or an idea land in one newsroom inbox.

02

Let AI create

AI writes, designs, narrates, dubs and renders. Editors approve.

03

Publish & learn

Schedule or publish to 8 platforms, then review post results.

The result

One connected process - from first headline to a published, measurable post.

CORE CAPABILITIES

A newsroom toolkit, not a collection of tools

Create video, audio and graphics without moving between disconnected products.

01

AI Story Builder

Article, link or idea to editable, multi-slide vertical video.

02

Brand Templates

Auto-fill stories and posts with story data, in every ratio.

03

AI Video

Use Seedance, Veo, Kling, Wan and other models.

04

AI Dubbing

Translate, clone voices, lip-sync and caption videos.

05

Voices & Characters

Vocalized Arabic narration and scene consistency.

06

Inbox & Automation

News feeds, breaking alerts and editorial approvals.

BRAND TEMPLATES

Design once. Fill every format.

Templates populate automatically from the article headline, summary, photo and source.

Arabic-first editors: RTL type, shaped typography and full narration tashkil.

AI WORKFLOWS

Automation with human judgment

Build the newsroom pipeline visually, choose local or cloud models, and keep approval gates.

Local + cloud

Run steps where you choose.

Cost visibility

Estimate cost before execution.

Scene consistency

Loop per scene, keep characters aligned.

AI DUBBING & LOCALIZATION

Make one story speak every language

A speaker-aware dubbing workflow with line-by-line editorial control.

01 **Transcribe**
Detect speakers and produce a transcript.

02 **Translate**
Choose a language or Arabic dialect.

03 **Re-voice**
Clone each speaker and revise any line.

04 **Finalize**
Lip-sync, add captions and review QC.

Illustrative interface

Arabic dialects + vocalized narration + per-line quality scoring.

NEWSROOM OPERATIONS

One inbox. Eight publishing channels.

Monitor feeds and approval requests, then review, schedule, publish and measure.

NEWSROOM INBOX

BREAKING — New item detected in RSS feed

REVIEW — Video story awaiting editor approval

SCHEDULED — Social post ready for 8 channels

Illustrative interface
