MWC DOHA 2026 · FADAAT MEDIA

Labeeb: AI-Powered Media Ecosystem

How Fadaat Media connected its AI services into one editorial framework — from the first draft to the final read.

Fadaat Technologey Devision

WHO WE ARE

One technology backbone for every brand

- Alaraby Aljadeed
- The New Arab
- Alaraby TV
- Alaraby TV 2
- Alaraby Plus
- Althania TV
- Syria TV
- Almodon
- WinWin
- Misbar
- Ultra Sawt
- Sehatok

+ Others More platforms across the group, served by the same shared technology

THE CHALLENGE

Four pressures on every newsroom

01
Speed
Stories break in minutes. Review and publishing can’t lag behind.

02
Quality
Six brands, six style guides — and Arabic copy that must be flawless.

03
Blind spots
Trends and competitor coverage move faster than any desk can track.

04
Formats
Audiences listen, skim, watch and ask. Text alone is no longer enough.

فضاءات FADAAT

THE SHIFT

One loop.

Every AI service we build plugs into a single editorial cycle — and every story that goes round makes the next one smarter.

THE FRAMEWORK

Six stages, one shared intelligence layer

01
Discover
Trend and competitor gap analysis

02
Draft
AI drafts suggested for each gap

03
Review
AI Editorial Assistant checks style, grammar and editorial guidelines

04
Publish
Workflow status and bottlenecks

05
Enrich
Audio, summaries, podcast, captions, chatbot

06
Measure
Top articles, authors and topics

Labeeb · the shared intelligence layer
Aggregates every brand’s CMS, trends services, competitors and other news outlets.

Gap Analysis

Find the stories we're missing

Labeeb continuously compares what our media brands publish with what audiences are searching for — and with what competitors are covering.

- Our coverage measured against trending keywords and topics
- Competitor gap analysis, topic by topic
- Gaps surfaced per brand, ready for editors to act on

Coverage gaps · today

2 gaps

Topic	Trend	Rivals	Us	Status
Transfers	Rising	6	0	Gap
Fuel prices	Rising	4	0	Gap
Viral claim	Peak	3	2	Covered
Reshuffle	Steady	5	3	Covered

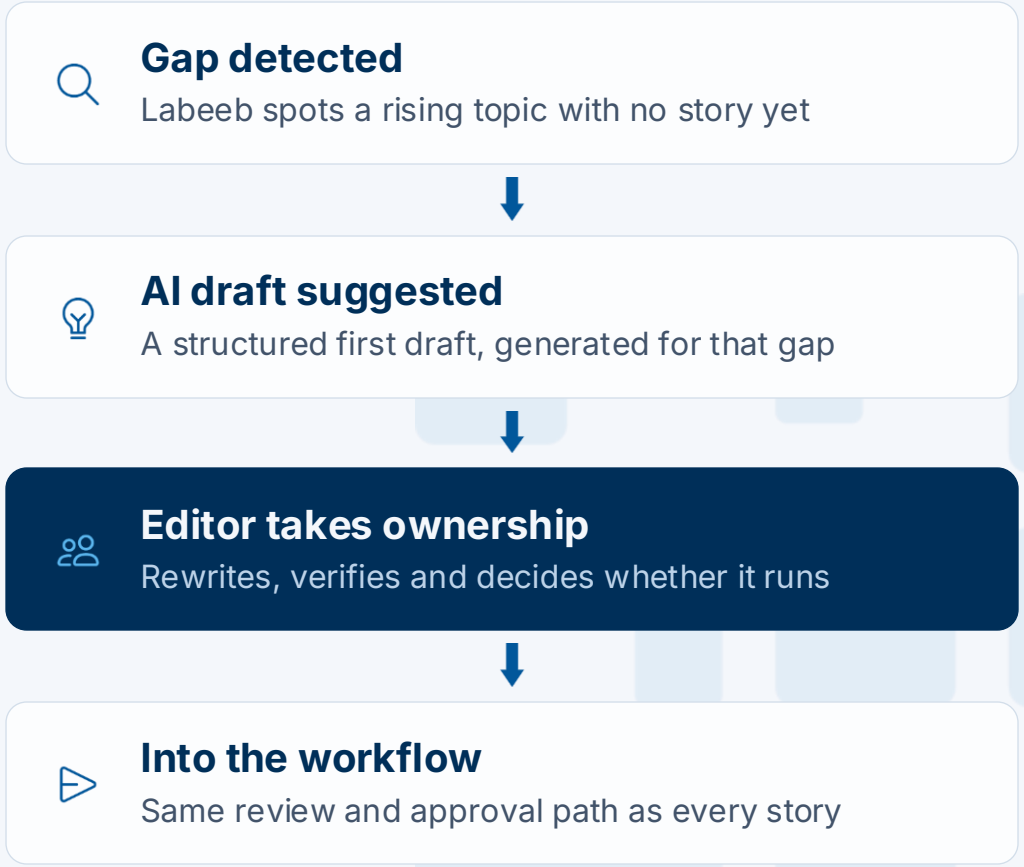

Illustrative view · Rivals and Us = stories published in the last 24 hours

AI Suggested Drafts

Turn every gap into a first draft

For each gap it finds, Labeeb suggests an AI-generated draft — so the desk starts from structured copy instead of a blank page.

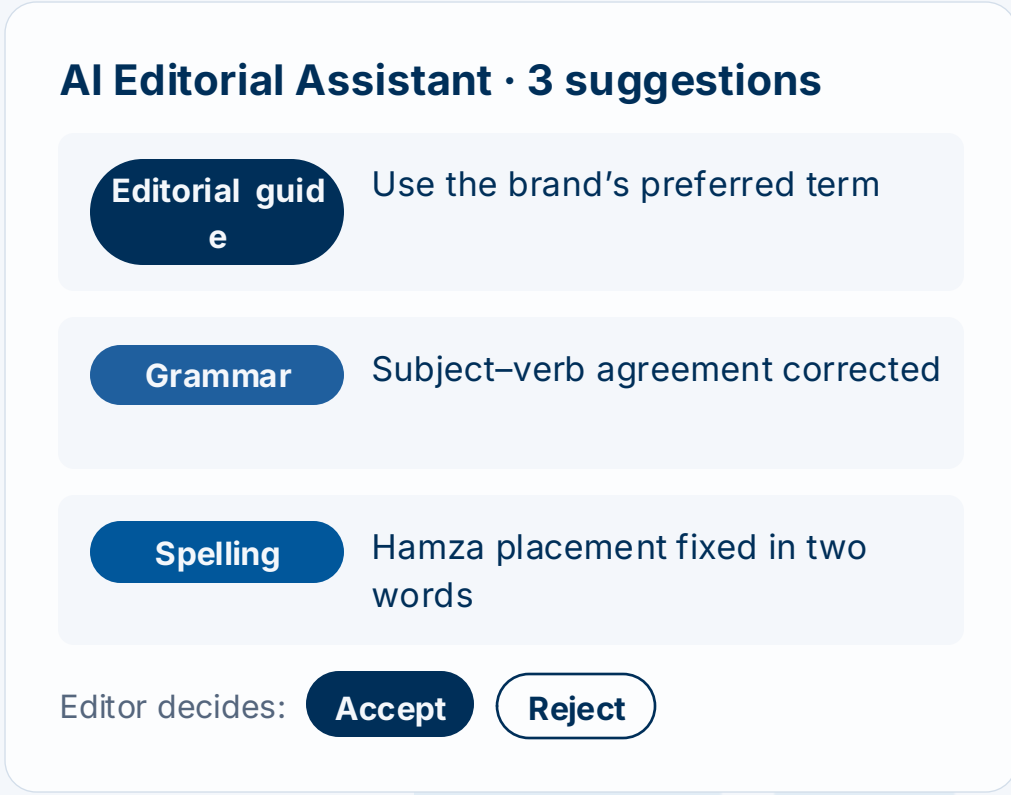

- Drafts generated directly from the identified gap
- Editors rewrite, refine or reject — people decide
- Accepted drafts follow the standard editorial workflow

The AI Editorial Assistant

The AI Editorial Assistant reviews copy against each brand's editorial guidelines and corrects Arabic grammar and spelling — before the story reaches the desk editor.

- Brand-specific style and editorial guidelines
- Arabic grammar and spelling correction
- Clear suggestions the editor accepts or rejects

Workflow Monitor

See every story, spot every bottleneck

Labeeb follows each article across all brand CMSs, from draft to published, so editors-in-chief see where stories wait and how teams perform.

- Live status for every article, across every brand
- Bottleneck detection at each workflow step
- Editorial team productivity at a glance

Enrichment AI Services

Plug & play modular services — integrated into every one of our brands' outlets.

Alaraby Aljadeed

Published article

Written once by the newsroom

AI Chatbot (Ask Araby)
Readers ask questions, answered from our own reporting

Text-to-speech
Every article as natural Arabic audio

Summarization
Key points for readers at a glance

AI-generated podcast
Articles turned into conversational audio

Translation
Stories translated to reach new audiences

Social media publishing
Social-ready formats, published across platforms

Build once, plug into every brand

SERVICE MODULES

- Text-to-speech
- Summarization
- AI podcast
- Translation
- Live captions
- AI chatbot
- Editorial Assistant
- + Next module

Shared plug & play layer · one integration pattern for every module

BRAND OUTLETS

- News websites
- Mobile apps
- OTT
- TV livestreams

Build once

One team builds and maintains each service for the whole group.

Plug in anywhere

A brand or outlet adopts a service by configuration, not a rebuild.

Improve once, everywhere

Every upgrade to a module reaches all brands at the same time.

Each brand keeps its voice

Modules are configured per brand: style, language and tone.

Enrichment services LIVE DEMO

Text-to-speech

Natural Arabic audio for every article

Summarization

Key points of any story at a glance

AI-generated podcast

Articles turned into conversational audio

Transcription & translation

Speech to text, then into new languages

Live captions

Real-time captions on Alaraby TV and Alaraby Plus

AI chatbot

Group-wide or per-brand answers from our content

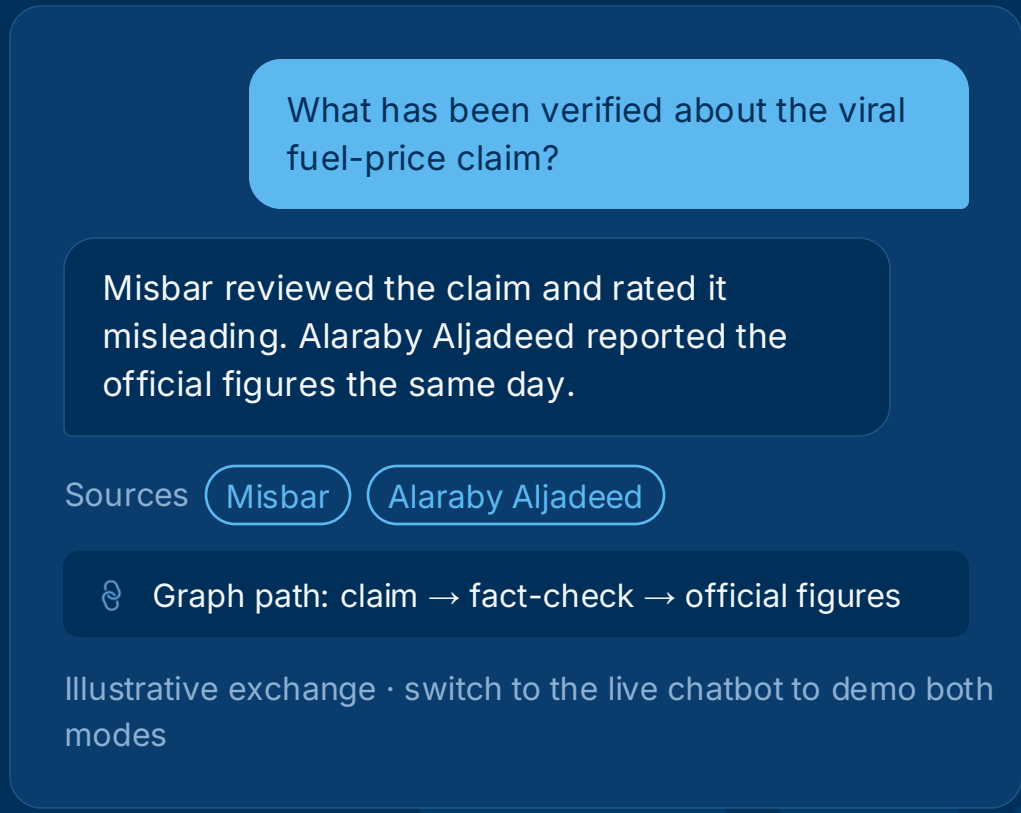

Enrichment services

LIVE DEMO · CONTINUED

AI chatbot: ask our journalism anything (Ask Araby)

Our AI chatbot runs in two modes: one chatbot across all our brands' content, or a dedicated chatbot per brand. Both build a full knowledge graph, so answers follow the links between people, places and events.

- Two modes: group-wide or per brand, on one engine
- Full GraphRAG: entities and relationships, not just keywords
- Answers grounded in our own published reporting

Learn what works, then feed it back

After publishing, Labeeb classifies and monitors performance across all six brands, so every desk knows what resonated with its audience.

- Top-traffic articles, tracked across brands
- Top authors and best-performing topics
- Insights flow straight back into gap analysis

ONE STORY'S JOURNEY

From signal to insight in one cycle

1–2 min

Discover

Labeeb flags a rising sports topic WinWin hasn't covered yet.

5–10 min

Draft

An AI draft is suggested; a WinWin editor picks it up and reworks it.

2–5 min

Review

The AI Editorial Assistant applies WinWin's style guide and fixes grammar and spelling.

5–10 min

Publish

The workflow view shows it clearing review without waiting.

1–3 min

Enrich

Audio, summary and a podcast segment follow; the chatbot can now answer on it.

24 hours

Measure

It ranks among top articles, and the topic weighs into tomorrow's gaps.

Indicative time window per phase · illustrative scenario; actual timings vary by story.

PRINCIPLES

What turns services into a framework

01

One data layer

Labeeb aggregates every CMS, so every service works from the same truth.

02

Build once, serve many

Each service is shared across the group and configured per brand.

03

Human in the loop

AI suggests, drafts and flags. Editors decide what gets published.

04

Arabic-first

Language quality, style rules and audio designed for Arabic from day one.

05

Closed feedback loop

Performance after publishing shapes what we cover next.

The result: an editorial system that gets smarter with every story it publishes.

IMPACT

What changed for our newsrooms

Faster
Shorter path from first draft to published story

Richer
Every story available as audio, summary and more

Consistent
Editorial quality and house style held at scale

Fewer gaps
Missed topics surfaced and turned into stories

More productive
Editorial teams spend time on judgement, not routine

Wider reach
Content reaches more audiences, formats and languages

Qualitative outcomes across Fadaat Media brands

APPENDIX · HACKATHON SCOPE

Six challenge tracks for the next module

Ask the Video

An interactive AI assistant that lets viewers ask questions about video content.

AI Translation & Subtitles

Automated multilingual subtitles and translation, with optional dubbing.

AI Sports Analyst

Conversational AI that delivers match insights, player comparisons and statistics.

AI Article-to-Shorts

Automatically transforms news articles into short-form videos.

AI Comment Moderation Engine

AI-powered moderation of user comments across supported platforms.

AI StoryCast

Combines the AI Editorial Assistant, summarization and text-to-speech into personalized audio news briefings — with potential for personalized content feeds.

CALL TO ACTION · AI VIBE CODERS

Build the next module with us

01 **Join the Fadaat AI Hackathon**
Build an AI module for media — the next box in our framework.

02 **Plug it into our framework**
Your module fits the same plug & play layer that serves every brand.

03 **Win a place in our internship**
Winners join the Fadaat Technology Internship Program, building prototypes, POCs and MVPs beside our project managers.
